Apollo Sports Event Management System

Day 1 – ER Diagram Design

Task of Day 1

Design the Entity Relationship (ER) Diagram for the Apollo Sports Event Management System. Identify the entities, define their attributes, and establish relationships between them.

What You Must Do

1. 1. Draw the Entities

- Use rectangles for the following entities:
  - Event
  - Game
  - Player
  - Registration
  - Match
  - Result

2. 2. Add Attributes for each entity

- Write the attributes inside or connected to the entity.
  - Event

    ●event_id (PK)

    ●event_name

    ●event_date

    ●event_location

    ●organizer
  - Player

    ●player_id (PK)

●player_name

●gender

●age

●department

●phone

- Game

●game_id (PK)

●game_name

●game_type

●event_id (FK)

- Registration

●registration_id (PK)

●player_id (FK)

●game_id (FK)

●registration_date

●status

- Match

●match_id (PK)

●game_id (FK)

●player1_id (FK)

●player2_id (FK)

●match_date

●match_status

- Result

●result_id (PK)

●match_id (FK)

●score

●remarks

3. 3. Connect Relationships

- Draw lines between entities to represent relationships:
  - Event Game (1 : Many)
  - Game Match (1 : Many)
  - Player Registration (1 : Many)
  - Game Registration (1 : Many)
  - Match Result (1 : 1)
